

REMARKS

In preparing the replacement drawings Applicants have not added any new drawing content. A portion of what was originally Figure 2(A) is now separately identified as Figure 2(G), which is an elevation view of the lug body taken from its rounded end. In the resubmitted Figure 3(C) reference numeral 54 has been added to identify the opening in the drum shell.

Reference numeral 58 does appear in the drawing portion now labeled as Figure 2(G). It identifies the extreme end portion of transverse opening 36.

Claims 1 and 2 were allowed and are resubmitted with no revisions. Claim 3 is now cancelled. New Claims 4 and 5 are presently submitted. New Claim 4 is closely similar to the statement made by the Examiner in his "Reasons for Allowance". It is therefore believed that Claim 4, and Claim 5 dependent from it, should be allowable.

Since this application is now in proper form and new Claims 4 and 5 appear to be clearly patentable, the early allowance of this application is respectfully solicited.
